

12. Establishing Galavezh Center Pediatrics Oncological Diseases in Duhok Governorate

As a part of its activities to support the local healthcare system, Heevie Organization is implementing a project involving extension of Heevi Pediatrics Hospital and establishing a specialized center (Galavezh Center) for Pediatrics Oncological Diseases. The center has the capacity of around 50 beds and will include the following units:

- Inpatient wards with capacity of 25 beds
- Daily patients' management and treatment ward with capacity of 25 beds
- Patient consultation rooms
- Medical procedures unit
- Pharmacy and drug preparation unit
- Administration and filing and archiving unit

The new center will be supported with the oxygen and medical gas system and will be established taking in consideration the highest medical engineering standards. The project involves establishing (Heevi Hospital Endoscopy Unit), which will be supported with the required systems and equipment to undergo the required tasks. The total budget specified for the project is 440,560 USD and is estimated to be finalized in 210 working days.
