

4-Project: Adoption

Heevie since the beginning concentrated on building social relations between Kurdish society and the Italian one, some of the fundraisers in Italy who are interested in donations for sake of patient children descending from poor families, found Heevie as the ideal source to provide such help to the poor patient children in Kurdistan Region.

Heevie had never hesitated to distribute such assistance and aids over the poor families of the children. Representatives of Heevie in Italy such as Dr. Jiyan Aziz played a big role in drawing the sympathy of donators to Kurdistan Region through different types of social and cultural activities in different cities in Italy.

The donations received every year may not fulfill the needs of such poor families in Kurdistan Region but it builds humanitarian relations between both societies. In 2012 six families get a donation from Italy and Switzerland.
