Shariya camp is considered among the largest camps in terms of area and population density in Dohuk governorate, with a capacity to host around 18,000 people. The camp has been established since 2014, with the start of the huge waves of displacement of the population to Dohuk governorate, especially from Sinjar district. In continuation of its programs to serve the IDPs in Dohuk governorate, Heevie organization is running the primary health care center in Shariya camp, doing a remarkable improvement in the services, as the services provided include the full package of primary health care services in addition to some services at the secondary level such as the ultrasound examination, oral and dental hygiene, and the medical laboratory examinations. The health staff working within Heevie PHC in the camp includes different specializations, who have been recruited in order to respond as much as possible to all the needs of the population, this included internal medicine, pediatrics, general surgery and gynecological specialities. This specific step had the greatest impact in reducing referrals to higher health levels and thus reduced the burden on those facilities and also decreased the economic, psychological and social impact of the residents of the camp. The project is being implemented with the support of World Health Organization, and the number of patients who received treatment during the year 2021 in Heevie PHC at Shariya camp reached about \(43,303\) patients.
