

## 2.Project: Registering and examining the Congenital Heart Diseases Children in Kurdistan Region

During the year 2021, Heevie Orgaization continued working on its program of documenting the details and information of the patients with congenital heart defects, in an effort to make them ready and available when any treatment or surgical intervention opportunity is available. This activity is implemented in cooperation with SIA Italian organization, through which an integrated database was created for patients with congenital heart defects in Kurdistan Region and Iraq, and it had a significant impact on the health status of the patients, their living conditions and their chances of obtaining treatment. During the year 2021, Heevie registered (353) new cases of children with congenital heart disease in its database.
