Heevie Monthly Report January 2026

“Farewell to the Camps: After a Decade of Service Since 2014”

Total Number of Direct Beneficiaries: 8,873 individuals

1. Projects and Activities

1. Project: Treating Patients and Training Local Medical Staff (in cooperation with Italian organizations)

Heevie continues to strengthen its partnership with leading Italian hospitals and medical institutions to ensure specialized treatment for patients and ongoing professional development for local healthcare staff.

- **1 patient with congenital heart disease were referred to Italy and underwent cardiac surgery.**
- **1 hematology patient continues to receive advanced treatment at IRCCS Burlo Garofolo Hospital in Trieste, Italy.**

2. Project: Registering and Examining Children with Congenital Heart Diseases

During this reporting period, a total of **30** children were examined and registered as part of Heevie ongoing program for early detection and referral of congenital heart disease cases.

3. Project: Primary Health Care Services – Bersivy IDP Camp (Duhok Governorate)

The Heevie static clinic in Bersivy IDP Camp provided **2,137** medical consultations, covering general medicine, maternal and child healthcare, and chronic disease management.

4. Project: Primary Health Care Services – Chameshku IDP Camp (Duhok Governorate)

The Heevie static clinic in Chameshku IDP Camp delivered **2,681** medical consultations, covering general medicine, maternal and child healthcare, and chronic disease management.

5. Project: Primary Health Care Services – Kabarto2 IDP Camp (Duhok Governorate)

The Heevie static clinic in **Kabarto2** IDP Camp delivered **696** medical consultations, covering general medicine, child healthcare, and chronic disease management.

6. Project: Physiotherapy and Medical Rehabilitation Services for People with Special Needs

Heevie provided **1,852** physiotherapy sessions, supporting individuals with disabilities and those requiring rehabilitation therapy to improve mobility and daily functioning.

7. Project: Heevie Center For Sports Activities, Physiotherapy And Medical Rehabilitation For Yazidi IDP Women And Children – Shariya Camp, Duhok Governorate

Heevie provided **1,475** Sports Activities, Physiotherapy And Medical Rehabilitation aimed at enhancing both the physical and mental well-being of Yazidi women and children residing in Shariya Camp.

8. Establishment of the Galavezh Center for Pediatric Hemato-Oncological Diseases – Duhok Governorate

Heevie continues the establishment of this specialized medical center, which aims to provide diagnostic, treatment, and follow-up care services for children suffering from hematological and oncological diseases.

9. Heevie Medicines Supply Support Project for IDP Camps and Public Health Facilities – Duhok Governorate

Introduction – January

During January, Heevie Organization continued its humanitarian and medical mission to support vulnerable populations in the Kurdistan Region of Iraq through life-saving medical care, rehabilitation services, and primary health care interventions. A key focus of the month was the treatment of children with congenital heart diseases and incurable illnesses, implemented in close cooperation with specialized Italian hospitals and medical partners in Italy.

In parallel, Heevie sustained its physiotherapy and medical rehabilitation services through its two specialized centers, providing essential support to people with disabilities, individuals with special needs, and Yazidi women and children in IDP camps. These services aimed to improve physical mobility, functional independence, and overall mental well-being.

Heevie also continued to provide primary health care services in several IDP camps in Duhok Governorate, delivering medical consultations, maternal and child health services to displaced families. However, January marked the final month of Heevie's direct support to IDP camps, following the cessation of funding from international organizations—bringing to a close more than a decade of continuous assistance since 2014.

Despite these challenges, Heevie remained committed to maintaining high-quality medical services and advancing long-term healthcare solutions, including the ongoing establishment of the Galavezh Center for Pediatric Hemato-Oncological Diseases in Duhok.

Total Number of Direct Beneficiaries during January: 8,873 individuals

Heevie Cooperation

In order to give the children a chance to have a normal life and to ensuring that children in Kurdistan receive the essential medical treatment they need, Heevie in a collaboration with **Associazione Iniziative di Solidarietà ODV** and various humanitarian agencies and hospitals in Italy, has become a vital lifeline for many young patients, granting them access to specialized medical care that may be unavailable in their home region.

The objective of this collaboration not only to provide immediate medical assistance to children in need but also to equip local healthcare staff with the necessary training and expertise. By collaborating with expert teams from Italy, local medical professionals can enhance their skills, leading to improved healthcare outcomes in the long term.

In year 2026, Heevie continued to cooperate with the following organizations:

- **Cuore Fratello – ETS :**

Heevie and Cuore Fratello – ETS with SIA Join Forces to Provide Life-Saving Heart Care for Children in Kurdistan For children suffering congenital heart disease in Kurdistan, Since 2006, Cuore Fratello – ETS, in partnership with Heevie, has been working tirelessly to provide crucial medical care.

Cuore Fratello – ETS is a foundation that embraces the cause of the right to health of the weakest, and is committed to concretely guaranteeing this right first of all to children, with particular attention to those with heart disease in developing countries Partnering with the renowned San Donato Hospital in Milan, they established a program that brings children to Italy to undergo life-saving operations. The impact of this partnership has been profound. From 2006 to 2025, a remarkable **103** patients with congenital heart disease have been treated at San Donato Hospital thanks to Cuore Fratello – ETS. This year, the commitment remains unwavering. Cuore Fratello and Heevie are continuing their vital work, **selecting 10 children** with congenital heart diseases for treatment in Italy. These young patients will receive advanced medical attention aimed at improving their health outcomes and offering them a brighter future free from the constraints of their condition.

- **IRCCS Istituto Giannina Gaslini :**

This vital project is part of Heevie's ongoing commitment to enhance pediatric cardiac care by providing specialized medical services to children who often face limited access to advanced heart surgeries. CHD is a significant health challenge worldwide, and access to timely and appropriate surgical intervention can dramatically improve the health and overall quality of life for affected children.

The cooperation agreement signed in 2024 for a period of two years between Heevie, with IRCCS Istituto Giannina Gaslini, and SIA to organized two a special medical missions in year to bring life-saving surgeries to children suffering from congenital heart diseases (CHD) in the Kurdistan Region.

The success of this mission hinges on strong collaboration. Heevie, working alongside its Italian partners, has joined forces with the Kurdistan Region's Ministry of Health and the General Directorate of Health in Duhok. This collaborative effort ensures the seamless organization and execution of the medical mission, allowing for the identification and treatment of children in need.

It's worth to mention that a successfully two mission was carried out in 2025.

- **Bambini Cardiopatici nel Mondo Association :**

The Enduring Partnership Between Heevie and Bambini Cardiopatici nel Mondo extend for over a decade, beginning in 2008, (in addition to the participation of other organizations) many missions have been accomplished in Kurdistan and many congenital heart diseases children's have been treated at the San donato Hospital in Milan

Beyond providing immediate medical care, the partnership has recognized the critical importance of sustainable solutions.

A significant component of their work involves a comprehensive program dedicated to training local medical staff, both in Italy and Kurdistan. This investment in the future ensures that the region gains the expertise and resources necessary to continue providing high-quality cardiac care for generations to come.

The success of this enduring collaboration is a Shared Vision Between Heevie and Bambini Cardiopatici nel Mondo share a fundamental belief in the right of every child to access quality healthcare, regardless of their location or socioeconomic background.

Heevie Cooperation

▪ IRCCS Burlo Garofolo, Trieste:

In collaboration aimed at improving the lives of children with complex medical needs, IRCCS Burlo Garofolo, a leading children's hospital, is partnering with Heevie and SIA to provide specialized healthcare services to children in Iraqi Kurdistan. This cooperation began with the signing of an agreement in 2024 for a period of two years, In addition to training program for doctors and medical staff by accompany the patients in this treatment process in Italy and as a result, two sick children were sent to undergo a bone marrow transplant operation.

IRCCS Burlo Garofolo is committing to providing specialized services designed to treat complex clinical cases that are often beyond the scope of treatment available in Iraqi Kurdistan. This collaboration encompasses a wide array of medical specialties, bringing expertise and resources to areas where they are critically needed.

The breadth of the collaboration is impressive, covering crucial areas like:

- Bone marrow transplants: Offering renewed chances at recovery for children with blood diseases.
- Oncology: Providing advanced treatment for pediatric cancers.
- Neuropsychiatry: Addressing neurological and psychiatric conditions in children.
- Rare diseases: Bringing expertise to diagnose and manage rare pediatric conditions.
- Allergology: Diagnosing and treating allergies and related conditions.
- Orthopedics: Providing specialized orthopedic care for children with musculoskeletal issues.
- Functional rehabilitation: Helping children regain function and independence after illness or injury.
- Metabolic pathologies: Addressing metabolic disorders affecting children.
- Pediatric surgery: Offering advanced surgical interventions for various pediatric conditions.
- Neonatology: Providing specialized care for newborns, particularly those with complex medical needs.

This year, **Four** children experiencing severe hearing loss have been selected to receive life-changing cochlear implant surgery. This surgery promises to restore their hearing by directly stimulating the auditory nerve. Following the procedure, these children will embark on a comprehensive rehabilitation program, including speech therapy and auditory training, to help them effectively adapt to their newfound hearing abilities.

Furthermore, two patients have been nominated to receive bone marrow transplants, offering them a significant chance at recovery and improved well-being.

▪ Cooperation with the Chinese Consulate

Heevie Organization collaborated with the Chinese Consulate to support the **Heevie Center for Sports Activities and Physical Rehabilitation for Yazidi** IDP Women and Children – Shariya Camp, Duhok Governorate.

1. Project: Treating Patients and Training the Local Medical staff in cooperation with Italian organizations

Since its inception in **2005**, **Heevie Organization** has adopted a comprehensive approach to healthcare, combining the treatment of diverse medical conditions—particularly childhood diseases, including complex cases such as **congenital heart disease (CHD)**, **onco-hematological diseases** (leukemia and thalassemia), **pediatric surgical conditions**, **ear, nose, and throat (ENT) disorders**, and **urological diseases**—with the strategic training of local medical personnel. This multifaceted initiative reflects Heevie’s strong and sustained commitment to strengthening healthcare infrastructure across the region.

The initiative has been implemented in close collaboration with several highly respected Italian medical and humanitarian organizations. Through these efforts, **(507) patients** received advanced medical treatment in Italy, while **(876) patients** underwent surgical operations performed by highly qualified Italian medical teams in the **Kurdistan Region of Iraq (KRI)**. Equally important has been Heevie’s emphasis on capacity building. A total of **(96) doctors** were trained in Italy, acquiring advanced skills and practical experience to be applied within their professional practice upon return. Additionally, **(926) local doctors and medical personnel** benefited from continuous on-the-job training provided by Italian medical teams in Kurdistan, ensuring the immediate application of newly acquired skills and contributing to sustainable improvements in healthcare service delivery throughout the region.

Congenital heart disease represents a significant global health challenge, affecting countless children worldwide. In Iraq, the need for specialized cardiac treatment is particularly acute. The **Heevie CHD Program** addresses this critical issue by facilitating regular medical missions carried out by expert Italian cardiac teams. These specialists not only perform surgical and interventional procedures but also transfer knowledge and expertise to local medical facilities, empowering Iraqi healthcare providers through hands-on training and professional mentorship.

The program adopts an integrated treatment approach. In addition to providing direct surgical interventions during field visits, Heevie coordinates the transfer of complex cases to specialized hospitals in Italy for advanced care. This dual approach ensures that children from various Iraqi governorates receive timely, appropriate, and individualized treatment.

The Heevie CHD Program has been continuously implemented since 2005. Over the past **nineteen years**, a total of **11,268 CHD patients** have been recorded in the Heevie database. During this period, the number of surgical operations performed by Italian medical teams for congenital heart anomalies in the Kurdistan Region is **(556)**, while the number of children transferred to Italy to receive treatment and surgical interventions reached **(321)** operations.

- In this month, **(1) patient with congenital heart disease were referred to Italy and underwent cardiac surgery and (1) hematology patient continues to receive advanced treatment at IRCCS Burlo Garofolo Hospital in Trieste, Italy**

2. Project: Registering and examining the Children with Congenital Heart Diseases

Since 2001, Heevie Organization has been dedicated to documenting and providing comprehensive support to individuals with congenital heart defects across the Kurdistan Region. Heevie conducted the first survey of children with congenital heart diseases, establishing an integrated database that remains a cornerstone of the organization's long-term medical assistance program.

This extensive database includes detailed information on more than 11,500 patients, covering their medical history, treatment received, and treatment outcomes. The data serve as a vital tool for coordinating care, research, and medical referrals.

Heevie works in close collaboration with cardiac centers across the Kurdistan Region, ensuring that patients are regularly referred for assessment, evaluation, and necessary medical interventions. This coordination has significantly improved timely access to specialized care for children suffering from congenital heart defects.

The documentation and support program has had a profound impact on patients' lives by:

- Facilitating early detection and treatment, thereby improving health outcomes.
- Enhancing living conditions through access to continuous medical care.
- Increasing the chances of life-saving interventions via partnerships with specialized national and international cardiac centers.

Despite remarkable progress, Heevie acknowledges the tragic loss of 1,682 patients due to the lack of available treatment opportunities. This underscores the ongoing challenge of ensuring equitable access to healthcare for all patients in need.

Through continuous efforts, Heevie remains steadfast in its commitment to supporting this vulnerable population, advancing medical documentation, and advocating for universal access to specialized healthcare services for children with congenital heart diseases.

During this month, Heevie Examined and registered (30) cases of children with congenital heart disease. The project is being implemented in collaboration with the Directorates of Health in various governorates and SIA Italian Organization.

3. Project: Primary health care services within Heevie static clinic in Bersivy IDPs camp in Duhok governorate

Zakho district of Duhok governorate

Camp Population 7,057

Since 2019

Heevie organization plays a vital role in providing health services to displaced families in Iraq, including the Bersivy IDPs camp in Zakho district. The camp houses thousands of families who were forced to flee their homes in Sinjar district during the war against ISIS in 2014.

Heevie provides a comprehensive package of primary health care services in the camp, aiming to meet the needs of the estimated 7,057 residents. These services include both curative and preventive measures, encompassing specialist doctor consultations, growth monitoring and evaluation, reproductive health care services, vaccinations, and advanced medical laboratory services. The PHC center operates 5 hours a day, 6 days a week, to ensure maximum accessibility and response to the camp residents' health needs. The experienced staff manage different departments and branches of the facility, including consultation rooms, dressing rooms, laboratory unit, pharmacy, and patient admission and isolation departments.

Heevie's commitment to providing quality health care in the Bersivy IDPs camp is evident in the range of services offered:

- **Curative Services:** These services address acute and chronic health conditions through doctor consultations, diagnosis, and prescription of medications.
- **Preventive Services:** These services aim to prevent the spread of diseases and promote good health through vaccinations, growth monitoring, and reproductive health counseling.
- **Specialist Consultations:** Specialized doctors provide expertise in areas such as pediatrics, gynecology, and general surgery.
- **Medical Laboratory Services:** Advanced laboratory equipment allows for accurate diagnosis and monitoring of health conditions.

By providing comprehensive health care services in the Bersivy IDPs camp, Heevie plays a crucial role in protecting the health and well-being of vulnerable families who have been displaced from their homes and are facing numerous challenges.

4. Project: Primary health care services within Heevie static clinic in Chameshku IDPs camp in Duhok governorate

Zakho district of Duhok governorate

Camp Population 16,883

Since 2022

Situated in Zakho District of Duhok Governorate, Chameshku Camp served as a critical sanctuary for a substantial population of internally displaced persons. By the end of Jan 2026, the camp hosted approximately 16,883 residents, comprising 3,615 families living in 5,000 tents. Recognizing the profound health challenges associated with prolonged displacement, Heevie Organization prioritized the revitalization of the camp's Primary Health Care Center (PHCC), transforming it into a vital hub for comprehensive medical services.

Through Heevie's strategic intervention, the PHCC evolved from an overstretched facility into a robust center capable of addressing both acute medical crises and long-term preventive health needs. Residents gained access to a wide range of essential services, including medical consultations, advanced laboratory diagnostics, and reproductive healthcare. Preventive health was emphasized through systematic growth monitoring and immunization programs, supported by an efficient referral system for specialized medical care.

The operational success of the PHCC was sustained by a dedicated team of medical professionals whose holistic approach focused not only on clinical treatment but also on empowering residents to achieve healthier and more stable lives. This commitment was essential in fostering resilience and a sense of hope within the camp's vulnerable community.

Chameshku PHCC data and achievements

5. Project: Primary health care services within Heevie static clinic in Kabarto2 IDPs camp in Duhok governorate

Semel district of Duhok governorate

Population estimate 16,943

Since 2019

The **Kabarto 2 camp** for internally displaced persons (IDPs) is located in the Semel district of Duhok Governorate. The camp accommodates around **16,943** individuals belonging to **3,549** families, all of whom were displaced from the Sinjar district in Nineveh Governorate as a result of the conflicts and crises that affected their hometowns.

Kabarto 2 is among the camps that receive health services provided by the Heevie Organization, whose clinic offers free medical consultations and treatment for both communicable and non-communicable diseases.

The camp's health center consists of several interconnected units that collectively ensure comprehensive care for patients. It includes dedicated consultation rooms for men and women, a medical laboratory equipped to perform essential diagnostic tests, and a pharmacy along with a storage facility to supply medicines and medical materials. The center also contains a patient admission and registration room, which helps organize the flow of cases and ensure timely medical attention.

6. Project: Heevie center for Physiotherapy and Medical Rehabilitation/ Semel district - Duhok Governorate

The **Heevie Rehabilitation Center** was established with support from the **World Health Organization** in November 2019 and operated through March 2022, after which Heevie continued to support the center, extending its commitment beyond financial aid. Recognizing the importance of a holistic approach to health, the organization also provides essential equipment, including sports gear, to enhance rehabilitation outcomes.

The center offers a comprehensive range of services aimed at improving **physical function, independence, and quality of life** for individuals with disabilities and special needs. With a specialized team of doctors, physiotherapists, nurses, and support staff, Heevie provides a holistic rehabilitation approach. Key services include:

- **Medical Consultation:** Expert guidance and diagnosis, including rheumatological and rehabilitation care.
- **Physical Rehabilitation Halls:** Advanced equipment and experienced therapists to improve mobility and recovery.
- **Massage & Laser Therapy:** Complementary treatments for pain management and tissue healing.
- **Supportive Devices:** Provision of wheelchairs, crutches, and other mobility aids.
- **Special Needs Support:** Tailored programs and assistive devices for individuals with visual impairments.
- **Administration & Management:** Ensuring efficient operations and quality service delivery.

Through these services, the center empowers individuals to overcome challenges, regain functional abilities, and lead more fulfilling lives. The dedicated staff fosters a supportive and welcoming environment, ensuring patients receive comprehensive care.

7. Heevie Center for Sports Activities and Physical Rehabilitation for Yazidi IDP Women and Children – Shariya Camp, Duhok Governorate

Heevie Organization, with the support of the Consulate General of China, implemented a project to establish a dedicated **Women's Health and Sports Center** in Shariya Camp. The center provides integrated **physiotherapy, fitness, and psychosocial wellness services** aimed at improving physical health, mobility, and overall well-being of **Yazidi women, girls, and children**.

The project delivers comprehensive rehabilitation and wellness support through a combination of **medical consultations, physiotherapy interventions, group exercise, and recreational and psychosocial activities**, with a particular focus on trauma-informed and inclusive approaches.

▪ **Medical Services**

Regular medical consultations with rheumatologists and joint specialists

Medical assessments and follow-up care coordinated with individualized physiotherapy treatment plans

▪ **Physiotherapy Services**

Assessment and treatment of musculoskeletal and post-injury conditions

Rehabilitation support for age-related mobility limitations and chronic pain

Physiotherapy services for children with developmental or congenital conditions

Training and guidance for caregivers to safely support family members with disabilities

▪ **Sports and Recreational Activities**

Women-only exercise sessions (yoga, stretching, aerobics)

Low-impact group fitness activities and walking clubs

Empowerment-focused physical activities supporting trauma recovery

Inclusive fitness programs for women and children with special needs

▪ **Psychosocial Support**

Relaxation and stress-management techniques

Art, music, and movement-based activities to promote emotional healing and social cohesion

January 2026 Outputs

1,475 women, girls, and children received structured rehabilitation, fitness, and psychosocial support sessions.

Heevie Center For Sports Activities, Physiotherapy And Medical Rehabilitation data and achievements

“The total number of daily participants in the center’s activities, including medical consultations, physical therapy sessions, and sports activities, is 1,475.”

Total Number of medical consultation : 273

Total Number of sessions (Physical Therapy) : 637

Total number of daily participations in women’s sports activities: 565

8. Establishing Galavezh Center for Pediatrics Hemato-oncological Diseases in Duhok Governorate

Heevie Organization is establishing the Galavezh Specialized Center for Pediatric Hemato-Oncological Diseases in Duhok Governorate in response to high rates of pediatric hematological and oncological conditions. The center is located within Hevi Pediatric Teaching Hospital, the main secondary and tertiary pediatric facility in the governorate, and is implemented directly by Heevie's Engineering Department.

Designed in coordination with Italian partners (SIA Organization and Biomedical Technology Consulting Company), the facility integrates the special needs of children with blood and cancer disorders. Key features include isolation rooms for critical patients, inpatient wards, daily treatment units, a chemotherapy preparation unit, a medical procedures room, and a dedicated pharmacy.

Construction follows modern medical engineering standards with high-quality materials to ensure safety, hygiene, infection control, patient comfort, and optimized workflow. Consultative meetings with the Directorate of Health in Duhok and Hevi Teaching Hospital have aligned technical, medical, and administrative aspects of the project.

Once operational, Galavezh Center will provide specialized care for hundreds of pediatric oncology cases, over 1,000 patients with Thalassemia and Sickle Cell Anemia, and approximately 175 patients with factor deficiencies such as Hemophilia. The project is supported financially and technically by Heevie Health NGO, reflecting its commitment to advancing pediatric healthcare in the Kurdistan Region.

Heevie Health NGO Goals

Heevie Health NGO

ریکخراوی هیفی یا ساخله می ریکخراوی نه حکومتی
منظمة هیفی الصحیة منظمة غیر حکومتیة

01

Help and support the vulnerable populations from both genders and all age groups who are exposed to disasters, conflicts and crises.

02

Preserve the mental and physical wellbeing.

03

Establish and develop projects in the field of health and community to increase the welfare

04

Provide the requirements and needs for developing and improving the basic life support service infrastructure and humanitarian activities.

Heevie Health NGO would like to extend its sincerest thanks to all donors and partners for their valued support
